

Please follow these instructions when installing your cartridge.

Many Canon PG and CL inkjet cartridges have nagging “Out-Of-Ink/Low-Ink Level” pop-up messages when using remanufactured inkjet cartridges. To prevent these messages from recurring, the following steps should be performed only once after each cartridge installation for either the black or color cartridge or when and if a cartridge is removed or replaced.

Step 1 > After installing the cartridge into the printer this screen prompt will appear **Select “OK”**

The same prompt is given when installing a new OEM cartridge; printers do not automatically print an alignment page.

Step 2 > When the first print job is queued or sent to the printer this screen prompt will appear with a print status prompt in the lower right side of the screen.

DO NOT SELECT, CLICK OR PRESS ENTER IN THE SCREEN PROMPTS

All-in-Ones > Press and Hold the Stop/Reset Button on the printer for 5 second or until the screen prompt disappears

Printers > Press and Hold the Resume/Cancel disappears.

If a cartridge is removed from the printer for refilling before it was empty the cartridge will print until the drop count had been reached. When the cartridge drop count is reached the software prompts will appear.

The print status prompt in the lower right side of the screen will appear with every print job but no further action is needed to print. Cartridges will always be displayed as Empty. Software prompts on newer Canon All-in-Ones/Printers may vary.

Stop/Reset Button (Canon MX-310)
